

# INTERNATIONAL SEARCH REPORT

International application No.  
PCT/CA2006/000670

<b>A. CLASSIFICATION OF SUBJECT MATTER</b> IPC: <i>F21S 4/00</i> (2006.01) , <i>G09F 13/00</i> (2006.01) , <i>H01L 51/50</i> (2006.01) According to International Patent Classification (IPC) or to both national classification and IPC		
<b>B. FIELDS SEARCHED</b> Minimum documentation searched (classification system followed by classification symbols) IPC: <i>F21S 4/00</i> (2006.01) , <i>G09F 13/00</i> (2006.01) , <i>H01L 51/50</i> (2006.01), <i>F21S*</i> Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched Electronic database(s) consulted during the international search (name of database(s) and, where practicable, search terms used) Canadian Patents Database; Delphion; Espacenet      Keywords: LED, light emitting diode, metal core printed circuit board, FR4 board, reflector, lens, housing, module, cove, heat sink, strip,		
<b>C. DOCUMENTS CONSIDERED TO BE RELEVANT</b>		
Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X, P	WO 2005/073627 (MATHESON) (Prior art by applicant) August 11, 2005 (11-08-2005) the whole document	1 to 8 and 10 to 12
X	US 6,882,111 (KAN et al.) (Prior art by applicant) April 19, 2005 (19-04-2005) the whole document	1, 4, 7, 8, 9, 10, 11 and 13
Y		2, 3, 5, 6, 12 and 14
Y	US 6,700,502 (PEDERSON) March 2, 2004 the whole document	4 to 7
Y	CA 2,342,267 (HOCHSTEIN) September 30, 2001 (30-09-2001) the whole document	2
<input checked="" type="checkbox"/> Further documents are listed in the continuation of Box C. <input checked="" type="checkbox"/> See patent family annex.		
* Special categories of cited documents : "A" document defining the general state of the art which is not considered to be of particular relevance "E" earlier application or patent but published on or after the international filing date "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) "O" document referring to an oral disclosure, use, exhibition or other means "P" document published prior to the international filing date but later than the priority date claimed "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art "&" document member of the same patent family		
Date of the actual completion of the international search 04 August 2006 (04-08-2006)		Date of mailing of the international search report 29 August 2006 (29-08-2006)

**INTERNATIONAL SEARCH REPORT**International application No.  
PCT/CA2006/000670**Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of the first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons :

1. ☐ Claim Nos. :  
because they relate to subject matter not required to be searched by this Authority, namely :
2. ☐ Claim Nos. :  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically :
3. ☐ Claim Nos. :  
because they are dependant claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows :

Claims 1 and 2 are directed to a cove illumination module comprising a heat sink.  
Claim 3 is directed to a cove illumination module comprising a metal core printed circuit board or a FR4 board.  
Claims 4, 5, 6 and 7 are directed to a cove illumination module comprising a linear reflector having a uniform longitudinal cross-sectional shape having one or more walls, the reflector configured to generate an asymmetric beam of light or symmetric beam of light.  
Claim 8 is directed to a cove illumination module comprising a housing manufactured from metal.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of additional fees.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claim Nos. :
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claim Nos. :

**Remark on Protest** ☐ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.  
☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.  
☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.  
PCT/CA2006/000670

Continuation of Box III:

Claim 9 is directed to a cove illumination module wherein the external housing unit and one or more optical elements are integrally formed.

Claim 10 is directed to a cove illumination module wherein one or more optical elements are configured to generate an asymmetric beam of light or a symmetric beam of light.

Claims 11 and 13 are directed to a cove illumination module wherein one or more of the optical elements are configured as a lens, the lens being a lenticular lens, toroidal shaped lens, Fresnel lens, or pillow lens.

Claims 13 and 14 are directed to a cove illumination module comprising two or more cove illumination modules operatively connected by an environmentally sealable electrical connection.

As none of the features found in independent claim 1 are novel, the claims lack unity of invention a posteriori.
